1 OVERVIEW OF THE TOOL

PROBLEM STATEMENT

Organizations dealing with marine pollution that conduct training exercises often face a lack of harmonization and standardization in the documentation produced during exercises, as well as limited tools for replicating and evaluating them.

OBJECTIVE

To strengthen training and exercise capacities of response organisations by providing knowledge, guidance and resources to prepare, develop and evaluate marine pollution response exercises. It will also facilitate the creation of an exercise program, enabling replication, lessons learning and collaboration with other organisations.

DATA USED

Exercise reports and supplementary documentation from organisations dealing with HNS pollution and on response to emergencies.

HOW IT WORKS

The exercise tool consists of four functionalities:

- Basic principles of exercising, describe the fundamentals and other support information based on a desktop study.
- Exercises database, an online repository of more than 150 exercises and associated documentation. Related to MMKT.
- Agenda to plan exercises program.
- The Exercise Tool, where the user can produce customised documentation as checklists, formularies briefing and debriefing reports, etc.

2 HOW IT WORKS & KEY RESULTS

USE CASE

To plan training activities such as exercises.

eg: *How to produce documents (e.g. briefing reports) for the exercise plan of my organisation.*

OUTPUT EXAMPLE

The screenshot displays the 'Exercise Tool' interface, which is divided into several sections:

- Tool Section:** Contains a sidebar with 'Exercises and activities', 'Participants database', and 'Equipment database'. A 'New exercise' button is highlighted with an orange circle.
- Follow the steps below to create your activity:** A central area with a progress bar showing '1. Select activity' and '2. Phase'. It includes buttons for 'New seminar / workshop' and 'New exercise'.
- Create Exercise Form:** A form with sections for 'Basic details', 'Evaluation', 'Documents evaluation', 'Updated evaluation files', and 'Drafting'. It includes fields for 'Exercise name', 'Exercise type', 'Report Author', and 'Executive Summary'.
- Exercise evaluator form:** A table for evaluating the exercise, with columns for 'Statement', 'Score', and 'Comment'. It includes a 'General comments' section.

Orange circles and arrows highlight the flow from the 'New exercise' button to the 'Create Exercise' form and then to the 'Exercise evaluator form'.
